ORACLE®
CLOUD APPLICATIONS

GlobalVox has demonstrated expertise in various Oracle Fusion Cloud applications

# The Advantage

Revolutionize the campus experience using cloud solutions

- Delivering cost savings, flexibility, and a framework to bring innovation on campus

- Securely warehousing student population data

- Offering greater interoperability and access

- Enabling expedited app development and deployment

- Automating the use of chatbots for instant engagement through mobile cloud services

# Migrate to cloud

Migration on-premises technology assets to the cloud can provide remarkable benefits as listed below -

- Shaping next-generation campus experiences that support retention
- Streamlining institutional operations
- Centralized secure data

GlobalVox team can take complete care of implementation of your existing system to cloud.

# Our Offerings

## Deliverables

- Define KPI / Success Criteria for Fusion implementation
- Evaluation of current implementation
- Preparing business process listing and documentation
- Understand high level business processes and prepare flow diagram
- Prepare and address burning issues
- Post-production support
- Refresher end user training

# Success Stories

**Thank You**
