  - Start testing early
  - Plan software test phases proactively
- Partnership with Market Leaders (Oracle, SAP)
- Industry-specific domain expertise
- Business driven focused testing approach
- Faster time-to-market
- Dedicated teams within offshore, onshore, and hybrid delivery frameworks
- Cost-effective testing techniques
- Focus on Project Management and Governance

### **Oracle EBS Testing Approach**

# Oracle EBS Testing Cycle

GlobalVox supports the following testing phases. However, testing level and detail will depend on service track, client needs, and complexity of EBS application landscape Each phase has its own test plan, test scripts and documentation	Unit testing	Requirement Analysis
	Functional testing	
	System testing	Test Planning
	Integration testing	
	Security testing	Test Cres Development
	Data Migration and Conversion testing	Test Case Development
	Mobile and Browser testing	
	Globalization testing (for international organizations)	Environment Setup
	Performance testing	
	Post-Migration Smoke testing	Test Execution
	Regression testing	
	User Acceptance testing	Test Cycle Closure
	Disaster Recovery / Business Continuity testing
